Asbestos Awareness Week

Activities and events

November 22 - 26, 2010

Why Asbestos Awareness Week?

Some people may be asking why is the last week in November Asbestos Awareness Week?

The reason the union movement allocates a week each year as 'Asbestos Awareness Week' is because asbestos is such a huge problem still. Australia has an unenviable record of one of the world's highest rate of asbestos related diseases and a legacy of asbestos containing materials (ACMs) in many workplaces and buildings - public and private, commercial, domestic and industrial.

The use of all forms of asbestos in Australia has been banned since 2003, including its import and export. But, because of the legacy of its use, we have not solved the problem of asbestos exposures for either people at work or in the general community.

To illustrate the seriousness of the problem, according to an August 2010 Safe Work Australia report [*Asbestos-related Disease Indicators*] in the 10 years ending 2008, the number of deaths attributed to asbestosis has more than doubled, while deaths from mesothelioma have grown 50%. The number of overall asbestosis deaths is increasing steadily, (109 in 2008 compared to 43 in 1998).

Increasingly unions around Australia are working with the community, asbestos support and advocacy groups and the Cancer Council to work towards an Asbestos Free Australia.

Activities and events

Monday November 22

Media conference VTHC

What is the asbestos policy of our political parties?

Results of Reps' survey

Workplace-based activities

Tuesday November 23
